

3M Versaflo Supplied Air Regulator

Product Images

Description

The 3M Versaflo Supplied Air Regulator ensures that there is a controlled, constant source of air. The Versaflo Supplied Air Regulator features an integrated warning whistle that indicates when air flow is low, to ensure the user's safety

- Locking control knob that allows airflow can be easily adjusted to the user's preference
- Airflow level ranges from 170 l/min to 305 l/min
- Provides protection against particulates, gases and vapours / combination hazards
- Integrated, replaceable active-carbon filter removes odours
- Auxiliary port allows air tools to be connected to regulator without affecting the airflow to the headtop
- Regulator unit can be positioned on the belt to accommodate right or left-hand users
- Features a swivelling bayonet connector which enables the breathing tube to move freely to the most comfortable position
- Approved to EN14594 with all features headtops
- Assigned protection factor (APF) of 40 with 3M Versaflo specifically designed for respiratory use, the Versaflo Regulator ensures smooth airflow, optimum safety and comfort
- Provides protection against particulates, gases and vapours or combination hazards from a source of compressed air
- S-Series, 3M-300 and 3M-400 headtops, APF of 20 with all others
