

Uvex UltraShield Faceguard

Product Images

Description

The Uvex UltraShield Faceguard attaches to any Uvex Ultravision Goggles for enhanced facial protection. The Ultravision Face Shield can be worn over respirators, making it the ideal addition to any industrial, mechanical or laboratory work environment

- Polycarbonate
- Clear face shield allows for easy communication
- Attaches to any Ultravision 9301 goggles for optimum protection
- Offers additional facial protection against splashes or flying particles
- Can be worn over respirators
- Designed with an easy 4-step, flip up function with hinge mechanism, allowing for the easy replacement of respirator
- Ergonomically designed with a large air volume for heat management, providing maximum comfort to the wearer
- The Uvex Ultravision Flip Up Face Shield offers additional protection to the lower part of the face and should not be used as a substitute for a full face protective shield/mask
- Medium impact approved
