

Scott Safety Interchange IV950ST Face Shield

Product Images

Description

The Scott Interchange IV950ST Face Shield is a metal mesh visor that provides protection to the wearer's face and eyes in industries with high levels of radiant heat. The Interchange IV950ST Face Shield has been designed to meet the requirements of EN1731 for radiant heat and increased robustness for the wearer's protection and safety. The metal mesh used in the design of the Interchange IV950ST Face Shield absorbs heat, allowing the wearer to work in comfort

- Coated steel mesh face shield
- Length: 235mm
- Part of the Interchange 900 series
- Protects eyes and face in industries with high levels of radiant head
- Conforms to EN1731:SG
