Description

The Versaflo M-406 Series Headtop with Shroud offers high levels of head, eye and face protection. The Headtop features a deflector which directs airflow inside the headtop ensuring increased control and comfort for the wearer.

- Lightweight, compact and well-balanced helmet
- Versatile - integrated protection from a range of respiratory, head, eye and face hazards
- The protective nylon shroud is highly durable and suitable for construction applications and heavy industry
- Fully adjustable suspension including textile straps for optimal fit and weight distribution
- Deflector allows users to direct the airflow inside the headtop
- Jawed visor can be lifted without removing the helmet
- Coated polycarbonate visor provides added chemical and scratch resistance
- Visor design combines peripheral and downward vision with good optical clarity
- Conforms to EN 12941 TH3
