

Weller WHP80 Preheating Plate

Product Images

Description

The Weller WHP80 Preheating Plate is an 80W plate that has been designed with precision temperature control from 50 to 200°C. The WHP80 Preheating Plate is ESD safe and suitable for lead free solders. By slowly increasing the temperature of a PC board prior to rework, the WHP80 Preheating Plate minimises the risk of damaging sensitive components

- 80W, 24V Preheating plate
- Electronic temperature control (50-200°C)
- ESD safe
- WT compatible
- Fits all 80W power supplies
- Heating surface: 80 x 50mm
- Size housing: 150 x 120 x 65mm
