

Olamef DIP Lead Forming Machine

Product Images

Description

- Straightens the leads of IC components for manual PCB insertion
- Uses same body structure as the well-tested TP6 series
- Adjusting a knob allows the feed rails to accommodate all IC sizes from .300" to 1"
- Self-adjustable driving belt allows almost all body thicknesses to be fed through the machine
- Standard model operated by a hand crank
- A motor drive unit can be added if required
