

Loctite 3611 Chipbonder Surface Mount Adhesives

Product Images

Description

Loctite 3616 designed for the bonding of surface mounted devices is particularly suited where very fast cure is required on high speed SMT lines. Loctite 3611 is made up of one component only meaning no mixing is required

- Dispense method - pin transfer and stencil print
- Cartridge Type: Semco
- Chemical type - epoxy
- Appearance (uncured) - red viscous gel
- Heat cure
- SMD components to PCB
- Wet strength - very high
- Small parts bonding
- One component requires no mixing
- 300ML
