

Loctite 3612 Chipbonder Surface Mount Adhesives

Product Images

Description

Loctite 3612 appears as a yellow viscous liquid in its uncured form and is designed for the bonding of surface mounted devices to printed circuit boards prior to wave soldering. Suited for applications where medium print speeds, high dot profile, high wet strength and good electrical characteristics are required

- Appearance (uncured) - yellow viscous liquid
- Cartridge Type: Semco
- Chemical type - epoxy
- Dispense method - stencil print
- Very high wet strength
- Surface mount adhesive
- One component requires no mixing
- 300ML
