## Description

---

Traditional combination pliers made from a top quality special tool steel, forged and oil-hardened to approximately 60 HRC for added strength and durability

- These pliers are oil-hardened and tempered and then separately induction-hardened ensuring the cutting edges are ideal for hard and soft wire
- Chrome-plated heads for smooth operation and handles heavy-duty PVC grip for a softer and more positive grip
- Gripping zones on the head jaws for flat and round material which are suitable for versatile use on almost any job application
