

Staticmaster Static Eliminator Brush

Product Images

Description

Staticmaster Static Eliminator Brush neutralises static and cleans dust from negatives, transparencies, slide mounts, film holders, enlargers, printers, and lenses. The soft hand-crafted brush whisks away dust and lint in one quick, easy operation

- Neutralises static and clears dust
- Polonium 210 element generates ionised air to neutralise both positive and negative electrostatic charges
- Removes dust without the need for sprays or chemicals
- Can be used to remove dry chemicals from balance pans to avoid analytical errors due to static attraction
