

Euromex Achromatic Magnifier with LED illumination

Product Images

Description

The Euromex Achromatic Magnifier is a chrome plated, high quality magnifying glass that has been designed with a small hole that allows the user to attach a cord for their convenience. The Euromex Achromatic Magnifiers are professional, foldable magnifiers with white LED and UV illumination options available to best suit the user's needs. Painted black and packed in a leather case, the Euromex Achromatic Magnifiers boast a sleek, modern design while also providing magnification of up to 20x, ensuring the highest standards are met by these products

- Lens Ø 20-21 mm
- Achromatic triplet lens for distortion-free, colour-correct viewing
- High-powered, folding magnifier for easy storage
- White LED illumination available for a uniform illumination of the object or for use in the dark
- UV illumination available for use with a number of applications, e.g.:
 - Extreme ultraviolet lithography
 - UV-ID
 - Label tracking
 - Barcodes
 - Optical sensors
 - Various instrumentation

- Decontamination of surfaces and water
- Forensic analysis
- Drug detection
- Protein analysis
- DNA sequencing
- Drug discovery
- Curing of polymers and printer inks
