

Bratts Ladders Swingback Ladders with Aluminium Treads

Product Images

Description

Bratts' Swingback Ladder with Aluminium Treads is designed for use in areas where minimum metal content is required. The Swingback Ladder is made from distinctive yellow fibreglass stiles fitted with aluminium treads. This is a solid yet lightweight structure designed to eliminate side sway and to withstand tough conditions

- Aluminium Treads angled at 65 degrees, fitted at 250mm centres
- Serrated solid rubber blocks and aluminium stiles
- Safe for use in all environments
- ANSI 14-5 and ESI 13-1
- Kitemarked BS EN 131
