

Dependable Red Traffic Barriers

Product Images

Description

The Dependable Traffic Barriers, made from recyclable UV polyethylene, are built for durability and reliability. The Traffic Barriers are ideal from use for segregation of construction and traffic areas

- Tough and durable red and white barriers for segregation of construction areas and traffic
- Made from recyclable UV polyethylene
- All barriers can be connected to form straight lines, squared and circled areas
- Barriers of equal size can be stacked for efficient storage and transportation
- For extra stability, barriers can be part-filled with water and forklifted into place
- Two different sizes available
- Base width 400mm on all sizes
