

Elten Vintage Lady Safety Boots

Product Images

Description

The Elten Vintage Lady Safety Boots are perfect for those who want to combine safety and comfort with a trendy modern design. Extremely comfortable and lightweight, the Vintage Lady Safety Boots are ESD safe and suitable for working in areas subject to electrostatic discharge and in electrostatic protected areas (EPA). The Vintage Lady Safety Boots feature a steel toe cap, padded tongue and Trevira BIOACTIVE fabric lining for natural ventilation and to improve breathability

- ESD safe, static dissipative sole suitable for use in electrostatic protected areas (EPA)
- S3 SRC
- Steel toe cap with protection against impact min. 200 joules
- Textile, penetration-resistant midsole
- Water-resistant
- Oil & fuel resistant non-slip sole
- Heat resistant to 130°C
- Trevira BIOACTIVE fabric lining - inhibits the growth of bacteria in and on the fibre. The BIOACTIVE lining offers increased breathability, improved cleanliness and a feeling of freshness
- Modern & sporty design with padded lining provides good stability & firm support
- TPU/PU sole - provides excellent slip resistance with antistatic properties
- Conforms to EN ISO 20345
