

North Cold Grip Gloves

Product Images

Description

Honeywell North's Cold Grip Gloves are ideal for the handling of damp, oily or greasy parts in cold environment. Encapsulated air molecules provide a vibration absorption feature, meaning the coating won't stiffen in the cold to help retain flexibility. The Cold Grip Gloves are ideally suited to tasks where workers need to protect their hands from cold conditions, without compromising on comfort or dexterity

- Ergonomic, seamless knit
- Vibration absorption feature - retains flexibility
