

Superior Nitrile Gloves

Product Images

Description

The Powder-Free Nitrile gloves are made from a low particulate synthetic material which offers a high puncture resistance. These gloves are suitable for users with a suspected latex sensitivity because they do not contain any protein in them. The Powder-Free Nitrile gloves are made from 100% pure heavyweight Nitrile for maximum durability

- Low particulate synthetic blue material with very high puncture resistance
- Strong and extremely comfortable
- Very low ionic extractable and particulate count
