

Aim-TTi TSX Series High Current Power Supplies

Product Images

Description

The Aim-TTi TSX Series of High Current Power Supplies are compact and lightweight high power units, with a fan-free operation that leads to no additional noise in the bench environment. The TSX High Current Power Supply units boast a fully variable OVP trip to protect against regulator failure, with other protection functions including regulator over-temperature and sense mis-wiring

- 35V-10A and 18V-20A models
- Bench or rack mounting
- High setting resolution, remote sense terminals
- Linear post regulation for unrivalled performance
- All models can operate in both constant voltage and constant current modes, with automatic crossover and automatic mode indication
