

Carpenter MFG. Co Less Abrasive Flat Cable Stripper

Product Images

Description

Strips flat cable containing either flat or round conductors. These are effective on insulations such as PVC, polyester, Mylar and polyethylene. Flat conductor type can be stripped one-side only

- Four different widths of stripping wheel are available
- 1/8" (3.2mm) , 1/4" (6.4mm), 3/8" (9.6mm) and 1/2" (13mm)#
- Two different grades of stripping wheel are also available
- One grade is used when the conductors are bare copper
- The other grade is used when the copper conductors are tin plated
- This is a less abrasive grade and does not remove the tin plating
- Capabilities Flat Cable – Flat or round conductors Solid or round conductors Stripping up to 1.75" (44.4mm) from end of flat cable
