

Lakeland MicroMax NS Cool Suit Coveralls

Product Images

Description

The Lakeland MicroMax NS Cool Suit has been designed with a superior quality MicroMax NS microporous film laminated fabric, which provides the wearer with an excellent barrier to light splashes and sprays of liquid. With a breathable back panel offering air permeability of 43 cubic feet per minute, optimum comfort is guaranteed

- Effective barrier against hazardous dusts (type 5) and liquid aerosols (type 6)
- Bound seam provides additional protection and superior strength and durability
- Elasticated hood, cuffs, waist and ankles
- Ergonomic design for maximum durability and freedom of movement
