

Amprobe XRA Series Digital Multimeters

Product Images

Description

The Amprobe® Test Tools' XRA-Series DMMs are designed specifically for today's electronics test, field service, and industrial applications. Each meter has a curved shape integrating a highly functional Magne-Grip™ holster with built-in magnetic hanging strap plus an easy-access battery door

- The Amprobe XRA Series encompasses five distinct models:
 - 30XRA Digital Multimeter with non-contact voltage detector
 - 33XRA Digital Multimeter temperature and frequency capacitance
 - 34XRA Autoranging Digital Multimeter with true-rms, backlight, temperature, frequency, capacitance, and an analog barograph
 - 37XRA Autoranging Digital Multimeter with true-rms, backlight, component test functions, 0.1 % accuracy, CAT II 1000 V, CAT III 600 V capability
 - 38XRA Autoranging Digital Multimeter with true-rms, backlight, CAT III 1000 V, CAT IV 600 V range and RS232 capability
