

Ansell HyFlex Heavyweight Gloves

Product Images

Description

The Ansell HyFlex Heavyweight Gloves, previously known as Neptune Kevlar, offer a combination of mechanical protection and cut-resistance. The 100% Dupont Kevlar construction offers a very high cut resistance to weight ratio and is ideally designed for use in primary industries such as automotive and machinery and equipment

- 100% Dupont Kevlar construction provides light-duty cut protection
- Terry loop technique enhances heat insulation
- High shock absorption without losing dexterity
- Neptune coating glove
- Reinforced thumb welt increases abrasion resistance
- Reversible design allows glove to be worn on either hand
- Cuff Style: Knitwrist
- Length: 230-280MM
- Conforms to EN388:2016 144XD
- Conforms to EN407: 2004
- Conforms to EN420:2003 + A1:2009
