

HandyMAN Non Contact Voltage Detector

Product Images

Description

The HandyMAN TEK7100 Non-Contact Voltage Detector is a standout voltage detector with a range of 100V to 600V AC. Designed and sized to conveniently fit inside pockets.

- Bright flashing red LED light illuminates the whole tip when voltage is detected
- Suitable for use in low-light conditions
- No metallic contact required, meaning it is suitable for outlets or against wire insulation
- Operating Range: 100 to 600V AC
- Operating Temperature: 10°C to 50°C
- Suitable for 50Hz and 60Hz systems
