

Metro Stationary Storage Shell

Product Images

Description

The Metro Stationary Storage Shell has fully extendable shelves, providing rapid access to its contents, increased productivity and ease of use. The Metro Stationary Shell is available in three widths.

- Increases storage capacity compared to standard shelving and carts
- Provides safe and comfortable access to parts and materials
- Stationary or mobile systems to meet the exact needs of any facility
- Use only the space required to store or transport desired materials
- Single, double, or triple wide sizes accommodate interior shells, either stationary or full extension
- Select your desired shell from the 12 available models
- Each shell comes complete with top and bottom wire shells, posts with slotted inserts, footplates (for stationary models) or extended base with 5" (127mm) swivel and brake casters (for mobile models), and necessary hardware
- Triple wide units also include one pair of intermediate posts to create a single wide and double wide bay to accommodate available shells
- Double and triple wide units (SXD and SXT models) may be internally divided into vertical bays to accommodate single or double wide shells as desired
- 2 intermediate posts required between each bay and come with appropriate mounting hardware
- Shells - MET SXS45OSQ - MET SXT72OMQ
- Shelves - MET SXSWQKD - MET SXDWARKD
- Accessories - MET9990P7 - METSXSLFDIV
- Enclosures - MET SX36SDPNL - MET SXTTEK
