

Dependable Salt Spreader

Product Images

Description

The Dependable Salt Spreader is compact, tough, and built to handle extreme temperatures and corrosive materials. The heavy-duty stainless steel frame system provides years of corrosion-free spreading

- Walk-behind salt/grit spreader
- Powder coated frame is welded and epoxy coated for durability
- Pneumatic tires minimises push effort
- Ergonomically designed handles to minimise operator fatigue
- Polypropylene hopper carries load of 100lb
- 13" tyres
- Standard sidewalk deflector provides spread pattern control
- Can also be used for top-dress sand, ice melt, limestone and fertiliser applications
