

Master Lock Stainless Steel Combination Padlock

Product Images

Description

The Master Lock Stainless Steel Combination Padlock is ideal for commercial and industrial applications, with a heavy-duty shackle and body. The Stainless Steel Combination Padlock is highly secure, with a deadlocking mechanism that protects against prying and shimming

- 4-digit 'set-your-own' combination
- Combination can be reset easily without a reset tool
- Large ergonomic dials with exclusive blind dial feature - permits operation with gloves, in low light or total darkness
- Internal components and dials are protected with a shackle seal and dial dust cover
- Durable, hard-wearing stainless steel body and shackle, offering excellent corrosion resistance
- 58mm wide body
- 28mm shackle
- Unit: Each
