

JSP Portagate 4 Gate Barrier

Product Images

Description

The JSP Portagate 4 Gate Barrier is light and compact yet durable, constructed with blow moulded high density polyethylene. The Class R1 high intensity reflective panels on the Portagate Barrier are 20% more reflective than standard lower grade reflective material

- Can be locked securely into formations by sliding the top hinge clip down panels
- Adjoining clips allow multi-positioning configurations such as a triangle, square or single line
- Can accept anti-trip feet for increased stability
- Recesses allow for toggle mounted courtesy signs
- Stackable to a height of 20 units
- Each individual barrier section: weight 2kg, height 1m, length of single barrier 750mm
