

3M M-207 Versaflo Face Shield with Flame Resistant Face Seal

Product Images

Description

The 3M-207 Versaflo Face Shield with Flame Resistant Face Seal is a highly versatile product which offers integrated protection from respiratory, face, bumpcap, eye and hearing hazards. The coated polycarbonate visor of the M-207 Versaflo Face Shield provides added chemical and scratch resistance, as well as excellent peripheral vision

- Flame resistant polyester face seal for applications with sparks and hot particles
- Lightweight and compact
- Offers the user increased control and comfort, due to deflector which allows user to direct the airflow inside the headtop
- Provides integrated protection from a range of respiratory, face, bumpcap, eye and hearing hazards
- Exceptional peripheral and downward vision with good optical clarity
- EN166 Medium Impact Protection
- Meets the performance requirements (TH3) for this type of product when used with specific 3M Versaflo Air Delivery Units
