

Moldex Compact Reusable Masks

Product Images

Description

The Moldex Compact Reusable Masks are ideal for use alongside visors and protective goggles, due to their half-mask design. The anatomically designed face seal of the Compact Reusable Masks ensure a secure fit, along with an optimal centre of gravity and lightweight design for wearer comfort

- Integrated gas and particulate filters for ultra-compact design, giving the wearer an excellent field of vision
- High degree of wearer comfort due to balanced centre of gravity and anatomically designed face seal
- Pleated filter technology for low breathing resistance
- Maintenance free
- Push to test valve
- Two filter types available:
 - FFA1P2 RD: protects against hazardous fine dusts, water and oil-based mists/aerosols, biological agents of risk group 2
 - FFA2P3 RD: protects against harmful and carcinogenic dusts, water and oil-based mists/aerosols, biological agents of risk group 2 and 3, CMR-substances
