

Dycem CleanZone Cleanroom Flooring

Product Images

Description

The Dycem CleanZone Cleanroom Flooring is a high-performance contamination control option, and is ideal for light wheeled traffic and heavier pedestrian flows. With the flexibility to be installed in areas of varying sizes and shapes, the CleanZone Cleanroom Flooring prevents over 99% of contamination from entering critical areas

- Controls all forms of foot, wheel and air borne contamination
- Excellent microbial protection due to the use of BioMaster in the manufacturing process (a high-performing anti-microbial additive)
- Ideal for use at pedestrian entrances/exits at critical areas, inside airlocks, gowning rooms and air showers and in hallways in order to prevent/control contamination
- Easy to clean and maintain
- Custom sizing depending on requirements - can be installed into areas that are different sizes and shapes
- Available in two different colour finishes - decorative colours to mask the contamination, or solid colours to highlight the contamination
- Suitable for traffic up to 70kg/cm²
- Heat resistance: 0°C to 50°C (32°F to 122°F)
- ESD safe to 108 ohms
- CE BS EN 14041:2004, REACH and California Proposition 65
- This item is POA (Price on Application) - please contact our customer care division for more information on colours and sizing options
