

Lakeland ChemMax 3 Coveralls

Product Images

Description

The Lakeland ChemMax 3 Coverall is a Type 3 & 4 coverall, expertly designed to provide a permeation barrier against a wide range of hazardous and toxic chemicals. Soft and flexible yet extremely durable, the ChemMax 3 Coverall features cushioned double-layer kneepads, inset sleeves and a diamond crotch gusset for superior comfort

- Superior multi-layer barrier films laminated to spunbound PP substrate 170gsm
- Double zip and storm flap front fastening
- Higher neck and zip flaps for enhanced face / neck protection
- Designed in Lakeland's "Super-B" style for superior fit, wearability and durability
- Very low noise level
- Extruded fabric construction results in smoother and more consistent fabric
- Scored 6 against the following liquid chemicals from EN 6529 Annex A - Acetone, Acetonitrile, Carbon Disulphide, Dichloromethane, Ethyl Acetate, n-Hexane, Methanol, Sodium Hydroxide (30%), Sulphuric Acid (96%), Tetrahydrofuran, Toluene
