

Ambu Rescue Mask

Product Images

Description

The Ambu Rescue Mask is designed to fit an adult or child, and features a one-way valve and directional diaphragm which prevents any backflow of air or contaminations from patient to rescuer. The Rescue Mask has been constructed from durable plastic and comes with a compact carry case

- Prevents direct contact with a casualty's mouth, nose and face
- Stops contact with saliva or blood when attempting resuscitation
- 100% latex free, ideal for those with a latex sensitivity
- Transparent dome allows rescuer to visually check for lip colour and vomitus
- Constructed from durable plastic for easy cleaning
- Compact carry case included
- Comes with O2 port as standard
